

Pool Ramp Kit Installation Instructions

The Leg Bracket is already installed on your PetStep Pool Ramp. Here are the instructions to complete assembly.

What's included:

- 2 - pool leg brackets
- 2 - pool legs
- 1 - cross brace
- 8 - thumb screws

INSTRUCTIONS:

1. Unfold your ramp and turn it over so that the underside is facing upwards.
2. Locate the bottom end of the ramp where the locking leg brackets are installed onto the ramp.
3. Slide the flat plate of the pool leg through the cutout in the bracket (from the center of the ramp outwards) so that the holes of the plate align with the three threaded inserts.
4. You will need to wiggle the legs into the bracket to properly slide the legs in place above the threaded inserts.
5. Use six of the thumb screws to hand-tighten each leg to the ramp.
6. Align the cross brace with the threaded inserts on the pool legs. Use the remaining two thumb screws to secure it to the legs.

FINALLY, ADD THE LOCKING BRACE KIT

Place a locking brace over each side of the ramp's hinge, using two thumb screws to secure each.

Align the two screw inserts on either side of the ramp hinge with the outermost holes on the locking brace.

Place the locking brace with the U-channel facing downwards over the screw inserts. Use two thumb screws to secure it.

Repeat the previous two steps to secure the second locking brace to the other side of the ramp hinge.

After installing the pool legs and locking brace kit, your PetStep ramp is ready to go in the pool! One person can put the ramp in the pool, but we recommend having someone else help you place the ramp. Lift the ramp up from the ground and flip it so that the top of the ramp is facing upwards and the pool legs downwards. Place the ramp in your pool, pool legs first. Position the ramp as needed to ensure that the rubber grips on the top of the ramp are resting on the edge of your pool. Initially, your ramp may float in your pool. Once the legs fill with water, your pool ramp will have a stable base and will be ready to use.

Now your pup can enjoy the pool!
